

ORCA 18 RGB / PAR56 RGB

SPECIFICATION SHEETS

ORCA 18

ORCA PAR56

EXPLANATION

ORCA RGB SERIES is a powerful and outdoor rated underwater with high lumen output and excellent color consistency. ORCA RGB SERIES are excellent solution for underwater Lighting.

ORCA RGB SERIES Series is produced in 18 pcs colored LED. ORCA RGB SERIES Series has a stainless steel body. It works at 24V DC to ensure connections over long distances. ORCA RGB SERIES Series provides easy setup and programming with standard DMX 512 protocols without special or complex communication protocols.

- ORCA RGB SERIES provides compatible communication with other fixtures using standard DMX 512 protocols without requiring any other special communication protocol or production ID. This feature allows for easy pixel mapping and addressing after all installations have been completed.
- ORCA RGB SERIES ingrounds enable flexible application using very long starter and jumper cables, since they operate in 24V DC input voltage.
- ORCA RGB SERIES Series work through Madrix® or Enttec software and hardware in coordination. Pixel mapping can be made easily by selecting fixtures in Madrix® or Enttec library.
- IP68 class ORCA RGB SERIES, are designed to meet the challenging requirements of exterior applications with their robust and durable structure. It is resistant to shock, vibration and other harsh conditions through die cast aluminium body and PMMA cover.
- Input is delivered through a IP68 connector and cables. Jumper cables can be determined according to the desired length of cable.

Output	RGB 18W
Light Source	18 High Power Colored LEDs
Lumen Maintenance	60.000 > hours L70 @ 50° C (full output)
Color Range	16.7 Million additive RGB colors
Ra(CRI)	RGB Full on ≥70CRI
Beam Angle	8°-25°-45°-60°
Luminous Flux	1176 lm
Efficacy (lm/W)	65 lm/W

Control & Programming

Color Resolution:	3 x 8-bit (Gamma correction)
Addressing:	RDM (Group of Remote Addressable Systems)
PWM Frequency:	1000Hz flicker free dimming
DMX / DALI Compliance:	USITT DMX512-1990
RDM Compliance:	ANSI/ESTA E1.20-2010

Electrical

Operating Voltage:	12V DC
Power Consumption:	18W
Connections:	Wire and Connector

Physical

Housing:	Die cast
Front Material:	PMMA
Installation Brackets:	Stainless steel
Gasket:	Silicon

Measurements:

Dimensions: (height x width x depth)	239 x 179 x 77 mm
Net weight:	0,78 kg

Environmental

Storage Temperature:	-40°C / +85°C
Ambient Temperature:	-25°C / +50°C
Operating Temperature:	-25°C / +65°C
Cooling:	Cooling by free water convection
Ingress Protection Rating:	IP68

Certificate: EN 60598, CE

Warranty: 3-year Limited Warranty

ORCA 18

ORCA PAR56

Suggestions to Reach for DMX Control

The total cable length should not be more than 300m without buffering.
 The total fixture number should not be more than 15 pcs on a single line without buffering.
 It is recommended to use only connection cables with a characteristic impedance of 120 ohm, where the DMX + and DMX - data lines are intertwined and there is a ground link as a coaxial screen surrounding the inner cores.
 120 Ω terminating resistor should be connected between the DMX + and DMX - output connections on the last fixture.
 Use a powered DMX splitter/buffer if it is necessary to separate the control link in order to feed fixtures in different locations.
 Make sure that the DMX + and DMX - connections do not get crossed at any point.

Notes:

- 1) Maximum total length of chain (fixtures and leader cable) is 50m.
- 2) Maximum total length of fixtures in chain is 15 pieces, varies by selected DMX personality.

RDM EXPLANATION

ORCA 18 RGB / PAR56 RGB

complies with the RDM Monitoring Command System. In order to use RDM Monitoring System, a compatible controller is required depending on the installation.

Through DMX data connection, it is possible to control the fixture's settings, send commands and receive or monitor the fixture's data.

* The command names and command functions used on different RDM controllers may vary.

* Incompatible RDM controllers may cause drawbacks such as partial operation, no-operation, or incorrect fixture information.

* You can check the recommended RDM controllers on the www.bayled.eu website.
