EXPLANATION

TETRA PRV RGB Series is a powerful and outdoor rated floodlight with high lumen output and excellent color consistency. TETRA PRV RGB are excellent solution for accent lighting, façade lighting applications and widely used in illuminating historical places, monuments in parks and other areas.

TETRA PRV RGB Series is produced in 96 pcs colored LED. TETRA PRV RGB Series has a die cast aluminium body. It works at universal power input 90 ~ 264VAC to ensure connections over long distances. TETRA PRV RGB Series provides easy setup and programming with standard DMX 512 and RDM protocols without special or complex communication protocols.

- TETRA PRV RGB Series provides compatible communication with other fixtures using standard DMX 512 and RDM protocols without requiring any other special communication protocol or production ID. They are remotely addressable in group via RDM protocol. This feature allows for easy pixel mapping and addressing after all installations have been completed.
- TETRA PRV RGB Series floodlights enable flexible application using very long starter and jumper cables, since they operate in 90 ~ 264VAC 50/60HZ universal voltage range.
- TETRA PRV RGB Series work through Madrix® or Enttec software and hardware in coordination. Pixel mapping can be made easily by selecting fixtures in Madrix® or Enttec library.
- IP66 class TETRA PRV RGB Series, are designed to meet the challenging requirements of exterior applications with their robust and durable structure. It is resistant to shock, vibration and other harsh conditions through die cast aluminium body and 5mm tempered glass cover.
- Input and output is delivered through a IP67 connector and cables. Jumper cables can be determined according to the desired length of cable.
- TETRA PRV RGB Series is produced in grey color as standard, and is also available in different colors in RAL code upon request.

Connections: Wire and Connector**Physical****Housing:** Die cast**Front Material:** Tempered glass (5mm)**Installation Brackets:** Stainless steel**Gasket:** Silicon**Color:** Grey (standard) or Custom Any RAL (optional)**Measurements:****Dimensions:** 564 x 462 x 252 mm
(height x width x depth)**Net weight:** 15,8 kg**Environmental****Storage Temperature:** -40°C / +85°C**Ambient Temperature:** -25°C / +50°C**Operating Temperature:** -25°C / +65°C**Thermal Protection** Automatic over temperature protection(+70°C)**Cooling:** Cooling by free air convection**Ingress Protection Rating:** IP66**Impact Resistance Rating:** IK09**Certificate:** EN 60598, CE**Warranty:** 5-year Limited Warranty

INDOOR ZONE

**Suggestions to Reach for DMX Control**

The total cable length should not be more than 300m without buffering.

The total fixture number should not be more than 15 pcs on a single line without buffering.

It is recommended to use only connection cables with a characteristic impedance of 120 ohm, where the DMX + and DMX - data lines are intertwined and there is a ground link as a coaxial screen surrounding the inner cores.

120 Ω terminating resistor should be connected between the DMX + and DMX - output connections on the last fixture.

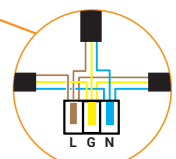

Use a powered DMX splitter/buffer if it is necessary to separate the control link in order to feed fixtures in different locations.

Make sure that the DMX + and DMX - connections do not get crossed at any point.

Notes:

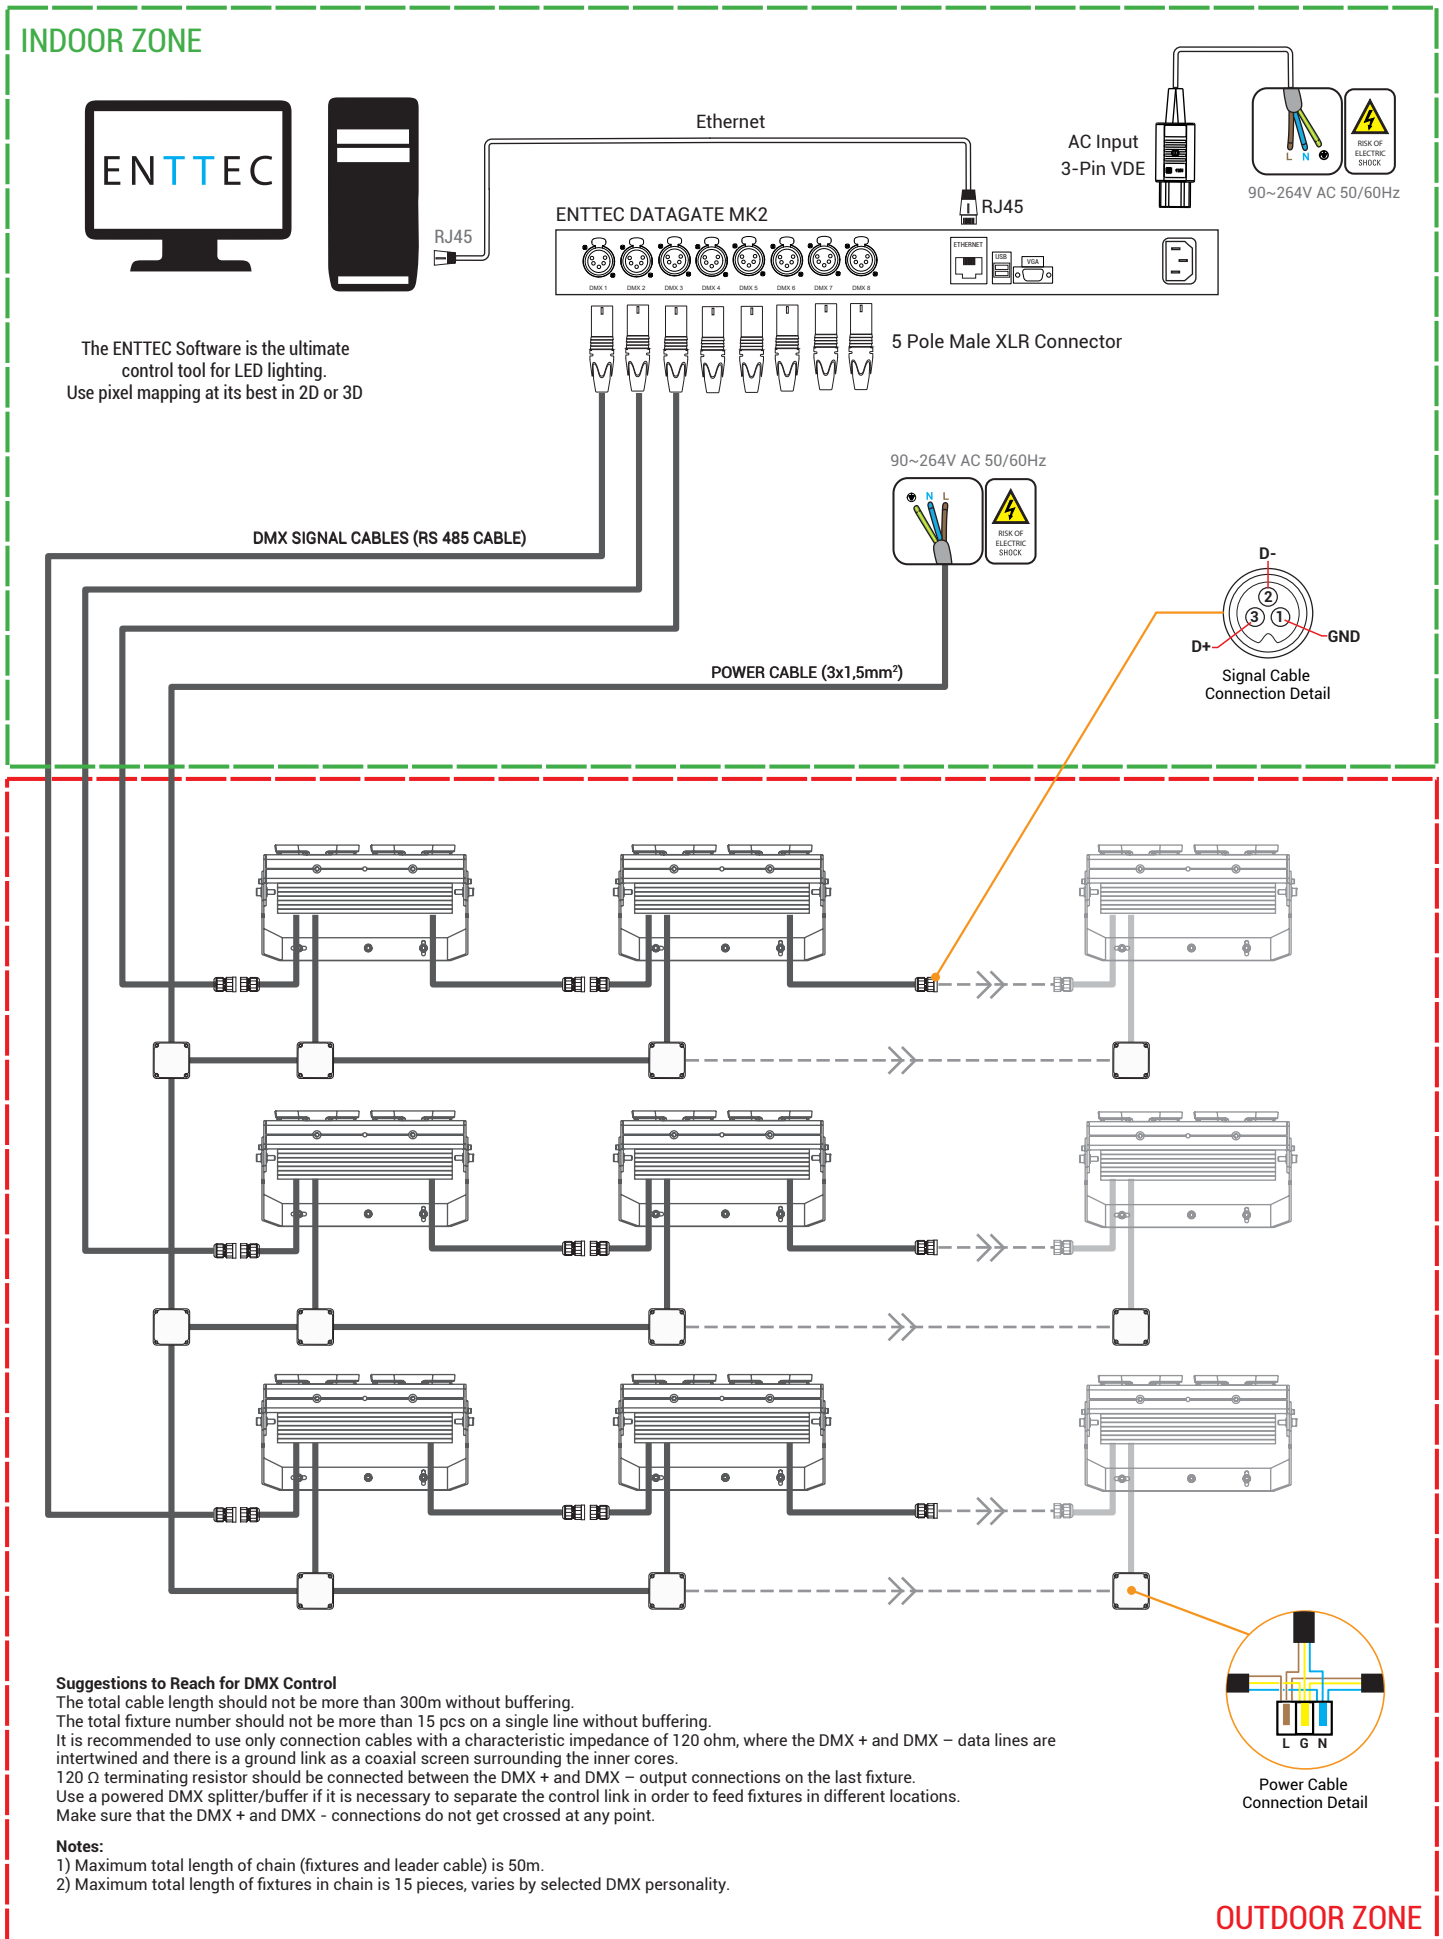

1) Maximum total length of chain (fixtures and leader cable) is 50m.

2) Maximum total length of fixtures in chain is 15 pieces, varies by selected DMX personality.

RDM EXPLANATION

TETRA PRV RGB SERIES

complies with the RDM Monitoring Command System. In order to use RDM Monitoring System, a compatible controller is required depending on the installation.

Through DMX data connection, it is possible to control the fixture's settings, send commands and receive or monitor the fixture's data.

* The command names and command functions used on different RDM controllers may vary.

* Incompatible RDM controllers may cause drawbacks such as partial operation, no-operation, or incorrect fixture information.

* You can check the recommended RDM controllers on the www.bayled.eu website.
